

St. Mary of the Angels

Kinesthetic Math: Jump2Math. Explore math in action with various active math stations to motivate mind and body to think MATH! Location: Gym

<https://jump2math.ca/mathnight/>

RSVP

Math and technology: The goal of this center is to expose students and parents to a variety of math apps and online math resources. Location: Library

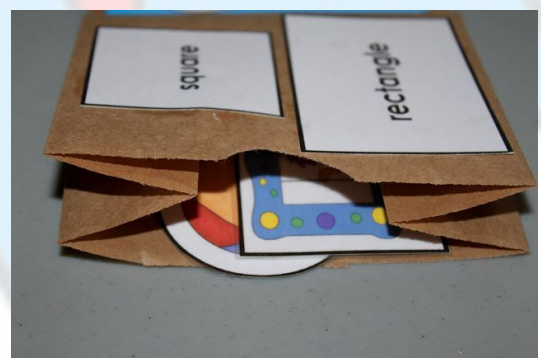

Check out this **Jump2Math** video link for what to expect.

Power Up Math Night!

St. Mary of the Angels invites you to **Power Up Math Night**, an opportunity to explore fun activities and engage our children in math. Several stations and activities will be set up in school for parents and students to participate in. Our goal is to expose families to different forms of math and increase student confidence in math.

Acing Math: This center will focus on a variety of games and activities using a deck of cards and dice. These simple games help to reinforce math skills in a fun way.

Manipulatives in Action ('Make and Take'): This center will focus improving math fluency and awareness by using everyday items. Families will also 'make and take' a resource to use at home.

Thursday May 9th, 2019

6:00pm to 8:00pm
